

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

Listing of Claims:

Claim 1 (Previously Presented): An information processing system comprising:
a digital cellular telephone set including a wireless communication link and a cellular network communication link, configured to transmit ~~which transmits~~ via a the wireless communication link a caller number specific to a caller, said caller number ~~which is~~ previously added to an incoming wireless signal via the cellular network communication link from a base station ~~of public circuit~~; and

an information processing apparatus ~~which receives~~ configured to receive said caller number transmitted by said digital cellular telephone set via the wireless communication link, configured to read ~~reads~~ personal information on said caller associated with said caller number from a storage means, and configured to display ~~displays~~ the information;

~~wherein said digital cellular telephone set transmits said caller number to said information processing apparatus via said wireless communication link,~~

~~whereby said personal information includes information other than the name and address of said caller associated with said caller number; and~~

~~whereby a summary of said personal information based on an electronic mail database is displayed, and detailed information associated with one or more items in said summary is displayed when said one or more items in said summary is selected.~~

Claim 2 (Cancelled).

Claim 3 (Currently Amended): An information processing apparatus comprising:

receiving means for receiving via a wireless communication link a caller number specific to a caller ~~which is~~ previously added to an incoming signal arriving at a called-station digital cellular telephone set from a caller-station digital cellular telephone set via a cellular network communication interface;

storage means for storing personal information on said caller associated with said caller number; and

read and display means for reading said personal information associated with said caller number from said storage means and displaying the personal information;

~~whereby said personal information includes information other than the name and address of said caller associated with said caller number; and~~

~~whereby a summary of said personal information based on an electronic mail database is displayed, and detailed information associated with one or more items in said summary is displayed when said one or more items in said summary is selected.~~

Claim 4 (Currently Amended): An information processing method comprising ~~the steps of:~~

receiving at an information processing apparatus via a wireless communication link a caller number specific to a caller ~~which is~~ previously added to an incoming wireless signal arriving at a called-station digital cellular telephone set from a caller-station digital cellular telephone set via a cellular network communication interface;

reading, from storage means for storing personal information on said caller associated with said caller number, said personal information associated with said received caller number[[,]]; and

displaying the personal information;

~~whereby said personal information includes information other than the name and address of said caller associated with said caller number; and~~

~~whereby a summary of said personal information based on an electronic mail database is displayed, and detailed information associated with one or more items in said summary is displayed when said one or more items in said summary is selected.~~

Claim 5 (Currently Amended): A program storage medium which causes an information processing apparatus to execute a program, said program comprising the steps of:

receiving via a wireless communication link a caller number specific to a caller previously ~~which is~~ added to an incoming signal arriving at a digital cellular telephone set from the digital cellular telephone set via a cellular network communication interface;

reading, from storage means for storing personal information on said caller associated with said received caller number, said personal information associated with said caller number[[],]; and

displaying the personal information;

~~whereby said personal information includes information other than the name and address of said caller associated with said caller number; and~~

~~whereby a summary of said personal information based on an electronic mail database is displayed, and detailed information associated with one or more items in said summary is displayed when said one or more items in said summary is selected.~~

Claim 6 (Currently Amended): A digital cellular telephone set comprising:

detecting means for detecting a caller number ~~which is~~ previously added to a transmitted incoming wireless signal via a cellular network communication interface from a base station of ~~public circuit~~; and

transmitting means for transmitting via a wireless communication link said caller number to an information processing apparatus which reads from a storage means and displays personal information on a caller associated with said caller number;

~~whereby said personal information includes information other than the name and address of said caller associated with said caller number; and~~

~~whereby a summary of said personal information based on an electronic mail database is displayed, and detailed information associated with one or more items in said summary is displayed when said one or more items in said summary is selected.~~

Claims 7-12 (Cancelled).

Claim 13 (Currently Amended): An information processing method comprising ~~the steps of:~~

detecting a caller number ~~which is previously~~ added to a transmitted incoming signal from a base station via a cellular network communication interface of public circuit; and

transmitting said caller number via a wireless communication link to an information processing apparatus which reads from a storage means and displays personal information on a caller associated with said caller number;

~~whereby said personal information includes information other than the name and address of said caller associated with said caller number; and~~

~~whereby a summary of said personal information based on an electronic mail database is displayed, and detailed information associated with one or more items in said summary is displayed when said one or more items in said summary is selected.~~

Claim 14 (Previously Presented): A program storage medium comprising the steps of:

detecting a caller number ~~which is~~ previously added to a transmitted incoming signal from a base station via a cellular network communication interface of public circuit; and

transmitting said caller number via a wireless communication link to an information processing apparatus which reads from a storage means and displays personal information on a caller associated with said caller number;

~~whereby said personal information includes information other than the name and address of said caller associated with said caller number; and~~

~~whereby~~ wherein a summary of said personal information based on an electronic mail database is displayed, and detailed information associated with one or more items in said summary is displayed when said one or more items in said summary is selected.

Claim 15 (New): The information processing system according to Claim 1, wherein said wireless communication link is a BLUETOOTH interface and said information processing apparatus is a personal computer (PC).

Claim 16 (New): The information processing method according to Claim 4, wherein said wireless communication link is a BLUETOOTH interface and said information processing apparatus is a personal computer (PC).

Claim 17 (New): The information processing system according to Claim 1, wherein:
the information processing apparatus is further configured to display a summary of said personal information based on an electronic mail database, and is configured to display

detailed information associated with at least one item in said summary when said at least one item in said summary is selected.

Claim 18 (New): The information processing apparatus according to Claim 3, wherein:

the read and display means are further displaying a summary of said personal information based on an electronic mail database, and are displaying detailed information associated with at least one item in said summary, when said at least one item in said summary is selected.

Claim 19 (New): The information processing method according to Claim 4, wherein the displaying further comprises:

displaying a summary of said personal information based on an electronic mail database, and after selecting at least one item in said summary, displaying detailed information associated with the at least one item in said summary.

Claim 20 (New): The program storage medium according to Claim 5, wherein the displaying further comprises:

displaying a summary of said personal information based on an electronic mail database, and after selecting at least one item in said summary, displaying detailed information associated with the at least one item in said summary.

Claim 21 (New): The digital cellular telephone set according to Claim 6, further comprising:

displaying means for displaying a summary of said personal information based on an electronic mail database, and for displaying detailed information associated with at least one item in said summary, when said at least one item in said summary is selected.

Claim 22 (New): The information processing method according to Claim 13, further comprising:

displaying a summary of said personal information based on an electronic mail database, and displaying, after selecting at least one item in said summary, detailed information associated with the at least one item in said summary.

Claim 23 (New): The program storage medium according to Claim 14, further comprising:

displaying a summary of said personal information based on an electronic mail database, and displaying, after selecting at least one item in said summary, detailed information associated with the at least one item in said summary.
